Insurance: Mathematics and Economics 1 (1982) 305
North-Holland Publishing Company

Author Index Volume 1 (1982)

(The issue number is given in front of page numbers)

Albrecht, P., Testing the goodness of fit of a mixed Poisson process (1) 27–33

Bowers, N.L.,Jr., J.C. Hickman and **C.J. Nesbitt**, Notes on the dynamics of pension funding (4) 261–270
Boyle, P.P. and **J. Mao**, Optimal risk retention under partial insurance (1) 19–26

Chan, B., Recursive formulas for discrete distributions (4) 241–243

De Vylder, F., Estimation of IBNR claims by credibility theory (1) 35–40
De Vylder, F., Best upperbounds for integrals with respect to measures allowed to vary under conical and integral constraints (2) 109–130
De Vylder, F. and **M. Goovaerts**, Analytical best upper bounds on stop-loss premiums (3) 197–211
De Vylder, F., see **M. Goovaerts** (2) 131–161
De Vylder, F., see **M. Goovaerts** (4) 287–302
De Wit, G.W., Underwriting and uncertainty (4) 277–285

El-Nadi, K.E.-S., On some multivariate density estimates and empirical Bayes problems (4) 245–251
Embrechts, P. and **N. Veraverbeke**, Estimates for the probability of ruin with special emphasis on the possibility of large claims (1) 55–72

Gerber, H.U., On the numerical evaluation of the distribution of aggregate claims and its stop-loss premiums (1) 13–18
Gerber, H.U., Ruin theory in the linear model (3) 177–184
Gerber, H.U., An unbayesed approach to credibility (4) 271–276
Goovaerts, M., F. De Vylder and **J. Haezendonck**, Ordering of risks: a review (2) 131–161
Goovaerts, M., J. Haezendonck and **F. De Vylder**, Numerical best bounds on stop-loss premiums (4) 287–302
Goovaerts, M., see **J. Haezendonck** (1) 41–53
Goovaerts, M., see **F. De Vylder** (3) 197–211

Haezendonck, J. and **M. Goovaerts**, A new premium calculation principle based on Orlicz norms (1) 41–53
Haezendonck, J. and **K. Janssen**, On multiple counting processes with the Markov property (3) 219–240
Haezendonck, J., see **M. Goovaerts** (2) 131–161
Haezendonck, J., see **M. Goovaerts** (4) 287–304
Heinkel, R., Equilibrium relationships between insurance and self-protection activity (2) 91–97
Hickman, J.C., see **N.L. Bowers, Jr.** (4) 261–270

Jansen, K., see **J. Haezendonck** (3) 219–240

Kremer, E., Exponential smoothing and credibility theory (3) 213–217

Mao, J., see **P.P. Boyle**, (1) 19–26

Nesbitt, J., Exploration of pension funding in case of exact vesting (4) 255–260
Nesbitt, C.J., see **N.L. Bowers, Jr.** (4) 261–270
Norberg, R., On optimal parameter estimation in credibility (2) 73–89

Sundt, B., Invariantly recursive credibility estimation (3) 185–195
Sundt, B., On the problem of testing whether a mixed Poisson process is homogeneous (4) 253–254

Taylor, G.C., Estimation of outstanding reinsurance recoveries on the basis of incomplete information (1) 3–11
Taylor, G.C., Zehnwirth's comments on the see-saw method: a reply (2) 105–108
Teugels, J.L., Estimation of ruin probability (3) 163–175

Veraverbeke, N., see **P. Embrechts** (1) 55–72

Zehnwirth, B., Comments on Taylor's see-saw approach to claim reserving (2) 99–103
